REMARKS

This paper is in response to the Advisory Office Action mailed on April 7, 2006 wherein the Examiner documented the docket problems with the present patent application. After reviewing the file an error was discovered. File numbers were transposed by the Applicant and an RCE for a different patent application erroneously used the serial number and docket number for the present patent application. Applicants have resubmitted a notice of appeal for the present patent application which is included with this response. If the Examiner believes that personal contact would be advantageous to the disposition of this case, he is requested to call the undersigned at his earliest convenience.
